## Intermarket Analysis Software (version 8.7)

Intermarket Analysis Software utilizing leading, not lagging, indicators

### Overview

Today's market world is inter-connected more than ever. Markets affect markets to such a degree that successful market players utilize the best intermarket analysis tools. In 1991, Market Technologies launched the first version of **VantagePoint Intermarket Analysis Software**. VantagePoint quickly changed the trading and investing landscape with its leading indicators and its proprietary **Predicted Neural Index** (PIndex). Since its first release, VantagePoint has provided an edge for traders and investors with every version. Version 8.7 follows the standard set by all of the previous versions – sharpen the necessary edge with useful and helpful features.

Neural networks are the heart of VantagePoint and every version has kept pace with the latest improvements in artificial intelligence (AI). This newest version has the most updated and reliable neural networks available. The highly sophisticated set of algorithms behind the neural networks create an intuitive outcome, a trend prediction for a market based on input from over 25 different but related markets. Independent tests conducted on data between 2007 and 2012 demonstrated VantagePoint's **PIndex** predictive success in a variety of categories.

**Company:** Market Technologies, LLC

**Phone:** 813-973-0496

**Web:** [www.tradertech.com](http://www.tradertech.com)

**Product:** VantagePoint Intermarket Analysis Software

Founded in 1979 by Louis B. Mendelsohn, the prominent technical analyst and trading software pioneer, Market Technologies Corporation was the first trading software developer in the financial industry to provide strategy back testing capabilities in trading software for personal computers with its introduction of ProfitTaker Futures Trading software in 1983. The result was the emergence of a multi-million dollar trading software industry based upon Mr. Mendelsohn's trading software and technical analysis concepts.

STOCKS 		COMMODITIES 		FOREX 	
Nike	77%	COMEX miNY Silver	79%	EUR/USD	80%
Bank of Montreal	80%	Emini S&P 500	80%	EUR/JPY	80%
Boeing	77%	RBOB Gasoline	80%	GBP/CHF	83%
Caterpillar	81%	Soybeans	79%		

*The purpose of this accuracy analysis was to pick a different time frame than what Market Technologies tested to demonstrate whether or not the accuracy is consistent over multiple time frames and multiple years. Accuracy and statistics were computed and verified by a seasoned trader and PhD in Mathematics. The time frame and markets were chosen by the independent researcher. A mixture of stocks, futures and forex markets were selected to test accuracy across all areas. The results were impressive.*

# Intermarket Analysis Software (version 8.7)

**Version 8.7 brings with it the same great predictive capabilities, as well as all of the great features found in version 8.6. Here are just a few.**

- VantagePoint delivers predictions for over 1300 markets in nine categories – *Futures, Commodities, Forex, ETFs, US Stocks, Canadian Stocks, Canadian Funds, Indian Stocks* (certain restrictions exist), and the *Australian Exchange*.
- The stocks category includes 12 major sectors of each stock market in the US, Canada, Australia, India, and the UK.

- The forex category includes the eight major currency pairs and 13 important cross-pairs.
- An increased number of ETFs in seven categories – commodity, currency, international, short, and ultra-short, Canada, UK, and US funds.

VantagePoint keeps the best of previous versions and adds more benefit to each new version, as over 10,000 customers in 115 countries demand it. Version 8.7 is the latest improvement to satisfy that demand. Here are some of the new features.

## New Features in VantagePoint 8.7

- ▶ Selected new intermarkets for all markets based on recent market conditions
- ▶ Trained neural nets for all markets and all predictions using the new intermarkets
- ▶ Updated market names and symbols for consistency with current market conditions
- ▶ Added new TSX Venture 50 stocks
- ▶ Added Rio Tinto ASX to Diversified Resources (Australia Stocks)
- ▶ Added four Forex markets:
  - British Pound / Australian Dollar (GBP/AUD) added to Cross Pairs
  - South African Rand / U.S. Dollar (ZAR/USD) added to Major Pairs
  - U.S. Dollar / Brazilian Real (USD/BRL) added to Major Pairs
  - U.S. Dollar / Israeli Shekel (USD/ILS) added to Major Pairs
- ▶ Now compatible with Windows 8

**Along with version 8.7 is a new data provider for VantagePoint. TradersOnly.com is now the preferred market data provider for VantagePoint Intermarket Analysis Software.** *TradersOnly.com* provides historical and end-of-day market data for over 70,000 traders, investors, and money-management professionals around the world, providing market data for:

- Over 600 US and international stocks and ETFs, including Australia, Canada, the UK, and India
- End-of-day futures and cash price data for the currency, energies, grains, indices, interest rates, meats, metals, and softs markets
- End-of-day prices for all major and cross currency pairs.

Every version of VantagePoint is faster, more reliable, more efficient, sleeker, easier to use, and it offers more features. One area VantagePoint cannot seem to improve on, though, is its customer service. It has been and still is top flight. Not only is your introduction to VantagePoint thorough and your questions answered completely, you also have access to free educational products, such as in-depth articles from successful VantagePoint traders about how to use VantagePoint, tutorial videos explaining successful VantagePoint strategies, e-books from users, webinars, and forums for discussing the ins and outs of VantagePoint. In short, Market Technologies wants you to succeed, and it has provided VantagePoint software and support to get you there.
